AP720 Analog Emergency Call Unit Wireless Enabled

Description

The AP720 Call Unit is a wall mounted speakerphone and alert system that operates over standard analogue phone lines. It can be used with or without a miALERT Event Management Server. Power is supplied over the analogue phone line, with no requirement for a separate dedicated power supply.

The AP720 can connect wirelessly to miPOSITION G2 Pendants and other miALERT wireless G2 devices to transmit alerts to the Event Management Server. It can also connect to wired miBUS peripherals.

Customisable face buttons allow for sending alerts to a connected phone system or miALERT Nurse Call System. The AP720 comes with a default button arrangement that has been configured for patient care environments.

Specifications

Unit: 170mm x 124mm x 45mm

Unit exposure from wall only: 112mm x 115mm x 30mm
